Sir:

REQUEST FOR RECONSIDERATION

Responsive to the Official Action dated April 4, 2003, please consider the favorably further remarks below for patentability of the claims of the above-identified application.

As the application now stands, claims 11, 14 and 15 are rejected under 35 USC §102(e) as being anticipated by U.S. Patent 5,814,839 to Hosoba. Claims 1, 3-4, 12-13 and 16 stand rejected under 35 USC §103(a) as being unpatentable over U.S. Patent 5,814,839 to Hosoba. All prior art rejections are again respectfully traversed.

Independent Claim 1

Claim 1 requires, e.g., that a lattice mismatch of the current diffusion layer is -1% or smaller. The Examiner admits that a lattice mismatch of -1% or smaller is not taught in Hosoba. However, the Examiner contends that it would have been obvious to minimize lattice mismatch of the current diffusion layer in order to prohibit a high dislocation density which degrades optical properties.
